PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of experience building and publishing cross-platform Android and iOS applications. Skilled in Clean Architecture, MVVM, Cubit, REST APIs, WebSockets, Firebase, unit and widget testing, performance optimization, localization (multi-language support), and Role-Based Access Control (RBAC). Experienced in leading development teams and owning projects from architecture through release on Google Play and the App Store.

WORK EXPERIENCE

Flutter Technical Lead

Rov Group (Saudi Arabia Startup) | Remote | Full-time | Aug 2025 - Aug 2026

Score: [escore.app](#) | [Google Play](#) | [App Store](#)

- Owned the Score Flutter application end-to-end, covering architecture, feature development, code review, and release, serving 5,000+ registered users, with 74% on iOS and 26% on Android, from a single codebase.
- Led the full software delivery lifecycle from requirements to release and maintenance; defined engineering standards and took part in developer interviews and hiring.
- Improved app performance by reducing jank frames and unnecessary widget rebuilds, measured with Flutter DevTools on low-end Android devices.
- Reduced data payload by 65% and API response latency by 54%, improving screen load times on slow mobile networks.
- Built the real-time layer using WebSockets for live score updates and animated tournament brackets, with offline caching using Hive.
- Led Flutter development for Saudi Host, a pre-launch travel platform connecting visitors in Saudi Arabia with local tour guides, using Role-Based Access Control (RBAC) with role-specific navigation and permissions.
- Implemented multi-language support with runtime language switching, and integrated Google Sign-In and Sign in with Apple, which accounted for 90% of account registrations.

Flutter Developer

Sound To Read | Freelance, Saudi Arabia Client | May 2025 - Jul 2025

[Google Play](#) | [App Store](#)

- Built and published a cross-platform Flutter application for children aged 6-12 on Google Play and the Apple App Store.
- Developed audio-based phonics lessons with native-speaker audio, progressive learning levels, and per-user progress tracking.
- Integrated speech-based assessments and parent progress reports through REST APIs, with local caching for offline use.
- Managed the full release process: Google Play Console and App Store Connect submission and kids-category compliance.

Flutter Developer

PureSoft | On-site, Single-app Freelance | Full-time | Jan 2025 - Mar 2025

Tarkibat: [Google Play](#) | [App Store](#)

- Delivered Tarkibat, a marketplace application connecting property owners with tradespeople across construction, painting and electrical services, published on Google Play and the Apple App Store.
- Built the application with Clean Architecture, Cubit state management and Firebase integration; profiled performance and improved UI and UX with the team.

Flutter Development Intern

PureSoft | Internship | Aug 2024 - Nov 2024

- Built Flutter features from Figma designs and worked within the team Git, code review and release workflow.

PROJECTS

CurAi | Flutter, Dart, Clean Architecture, Cubit (Graduation Project). Medical appointment booking app with doctor discovery, scheduling and patient profiles. github.com/mohamedmagdy2301/CurAi_app_mobile

Azkary | Flutter, Dart, Hive. Offline-first Islamic app with prayer times, azkar and daily supplications. github.com/mohamedmagdy2301/azkary_app

More Flutter projects: news, weather, bookly and notes apps - github.com/mohamedmagdy2301

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android, iOS, Cross-Platform Mobile Development, Material Design, Cupertino, Responsive UI, Animations

Architecture and State Management: Clean Architecture, MVVM, SOLID Principles, Object-Oriented Programming (OOP), Cubit, State Management, Repository Pattern, Dependency Injection, Role-Based Access Control (RBAC)

Data and Integration: REST APIs, WebSockets, JSON Serialization, Firebase, Hive, Local Storage, Offline Caching, Push Notifications, Google Sign-In, Sign in with Apple

Testing and Performance: Unit Testing, Widget Testing, Flutter DevTools, Performance Profiling, Debugging, Code Review

Release and Localization: Google Play Console, App Store Connect, TestFlight, App Signing, Internationalization (i18n), Localization (l10n), Adaptive Layouts

Tools and Version Control: Git, GitHub, Android Studio, Xcode, Visual Studio Code, Figma, Postman

Languages: Arabic (Native), English (Professional Working Proficiency)

EDUCATION AND CERTIFICATIONS

Bachelor of Science in Computer Science | Egyptian E-Learning University (EELU) | Graduated 2025

Professional Diploma in Mobile Application Development (Flutter) | Information Technology Institute (ITI), Menoufia | Sep 2023 - Jul 2024

Certifications: Clean Architecture in Flutter (Foundations and Deep Dive), Flutter Advanced: Bloc and MVVM, Complete Flutter and Dart Development
